

Black Hills Behavioral Health Guide

2014

Mental Health Providers
Substance Abuse Providers
Psychological Testing
Suicide Survivor Support

*"Making lives better by giving support, offering hope
and creating connections all day, every day."*

ABOUT THE BLACK HILLS BEHAVIORAL HEALTH GUIDE

Welcome to the 2014 Black Hills Behavioral Health Guide. The Guide is being produced as an initiative of the Black Hills Mental Health Substance Abuse Collaborative and funded by the John T. Vucurevich Foundation. This guide was established to help the consumer more readily identify and select licensed/credentialed practitioners and agencies that provide a variety of behavioral health services in the Black Hills area. It provides the community with easily accessible information about the services that are listed.

Organizations and/or behavioral health practitioners are listed throughout the guide alphabetically. There are three additional ways to find a specific resource:

To Find a Behavioral Health Practitioner by Name...

Search alphabetically for the last name of the person you are seeking in the **Practitioner Name Index** on page 11. Listed to the right of their name you will find a page number that will direct you to the organization with which they are associated.

To Find an Organization and/or Behavioral Health Practitioner by Service Category...

Search by the following service categories: Children/Adolescent Therapy, Christian Based Therapy, Abuse Issues (for children and/or adult victims and survivors), Addiction/Substance Abuse Services, Psychological Testing, Geriatric and Other. The names of the organizations and/or behavioral health professionals are listed alphabetically in the **Service Category Index** on page 5.

To Find an Organization and/or Behavioral Health Practitioner by City. . .

Search alphabetically in the **Location Index** on page 9 for the name of your city or the city closest to you.

Inclusion in this Guide should in no way be construed to constitute an endorsement of a practitioner, an agency, organization, or its service, nor should exclusion be construed to constitute disapproval. The information and certifications which appear in this publication were self-reported by the organizations and practitioners.

SELECTING A BEHAVIORAL HEALTH PRACTITIONER

There is much role ambiguity among behavioral health practitioners meaning that people with quite different training may be similarly employed. The purpose of this is to create an array of perspectives in team settings or to match those needing services with whom is best able to help them. The following definitions do not capture all of the activities of each profession, but highlight their strengths.

Counselor - Counselors are trained in therapeutic technique and theory. They provide “talk therapy” as opposed to medication to help people with their concerns. Some counselors have extra focus on a specific topic such as marriage and family. In the behavioral health setting counselors can be found providing therapy or case management services.

Chemical Dependency Counselor - Works with people to overcome an addiction to drugs or alcohol in individual or group settings. They may also assist families of people with addictions to better understand addiction and how to help their loved one. There are four increments of chemical dependency counseling certification: Trainees, level 1, level 2, and level 3 practitioners.

LPC - This is an abbreviation for Licensed Professional Counselor; it means that the counselor meets at least minimum state standards to provide counseling services to the public.

LPC-MH - This is an abbreviation for Licensed Professional Counselor - Mental Health; it is a higher level of licensure requiring more training and supervision.. The LPC-MH level may be required for insurance or Medicaid reimbursement.

Psychiatrist - A psychiatrist is a physician with additional specialized training in psychiatry. In the behavioral health setting, psychiatrists prescribe medications and engage patients in therapy. Under the supervision of a physician, physician’s assistants and certified nurse practitioners can also prescribe medications.

Psychologist - Licensed psychologists complete a standardized training program at the doctoral level. Training involves understanding the development of personality, learning and interpersonal relationships. Using tests to evaluate individuals is usually a major emphasis, but they also conduct individual, family and group therapy.

School Psychologist - Works in the school setting to help individual students resolve learning and behavioral challenges that are affecting academic performance and to help teachers improve the learning process. School psychologists are trained in both psychology and education.

Social Worker - Social workers are trained to complete a variety of tasks and are found in many areas outside of behavioral health services. In the behavioral health setting, social workers might provide talk therapy, case management or connect people to resources.

SWA - This is an abbreviation for the licensure title of Social Work Associate. Social workers with this credential have met minimum state standards to practice social work.

SW - This is an abbreviation for the licensure title of Licensed Social Worker. Some social workers indicate this licensure as LSW to match the paper license they received when they became licensed. Social workers with this licensure most likely completed a bachelor’s of social work (BSW) degree.

CSW - This is an abbreviation for the licensure title of Clinical Social Worker. Social workers with this licensure have completed a master’s of social work (MSW) or a doctorate of social work (DSW) degree.

CSW-PIP - This is an abbreviation for Clinical Social Worker - Practitioner in Private Practice. It is a higher level of licensure requiring more training and supervision to qualify for. The CSW-PIP license may be required to bill certain insurance providers.

Learn more about South Dakota licensing requirements by visiting the Licensing Boards page at dss.sd.gov for alcohol and drug professionals, counselors, psychologists and social workers or doh.sd.gov for physicians and nurses.

SELECTING A BEHAVIORAL HEALTH PRACTITIONER

Choosing among the many options available in behavioral health care can be a confusing task. As with any type of service there are basic questions that can assist you in becoming an informed consumer. Ask yourself these questions:

- * What are the critical issues for which you would like to obtain help and what are the desired results you hope to see?
- * Do you have a preference regarding type of setting (i.e. inpatient, outpatient, group therapy, etc.) or type of therapeutic approach?
- * Is there a particular time of the day or week that would be best for you to arrange an appointment?
- * Is there coverage offered by your insurance, health care plan, or employer that can offset some or all of the cost of treatment?

With this information in mind, select two or three behavioral health practitioners and call for a short phone interview. Briefly describe your issues or goals and ask if the provider is skilled in these areas. Ask a few questions about the provider's background and practices.

- * What therapeutic approaches and techniques does she or he most frequently use?
- * How will therapeutic goals be established? How will you know when therapy is complete?

After talking with a potential practitioner, ask yourself:

- * Did you feel a sense of confidence in this person?
- * Did the practitioner's approach seem to make sense to you?
- * Did you feel comfortable talking with this practitioner?

Glossary of Abbreviations

This is a key to abbreviations used throughout this guide, primarily for professional accreditations and certifications.

ACSW	Academy of Certified Social Workers
ACP	Applied Cognitive Psychology
ACT	Addiction Counselor Trainee
BA	Bachelor of Arts
BS	Bachelor of Science
BSW	Bachelor of Social Work
CAC	Certified Addictions Counselor
CCDCI	Certified Chemical Dependency Counselor, Level 1
CBIS	Certified Brain Injury Specialist
CBIST	Certified Brain Injury Specialist Trainer
CCMHC	Certified Clinical Mental Health Counselor
CDCT	Chemical Dependency Counselor Trainee
CNP	Certified Nurse Practitioner
CNS	Clinical Nurse Specialist
CPC	Certified Professional Coach
CPS	Certified Prevention Specialist
CSW	Certified Social Worker
CSW-PIP	Certified Social Worker-Practitioner in Private Practice
EdD	Doctor of Education
EdS	Education Specialist
FNP	Family Nurse Practitioner
LAC	Licensed Addiction Counselor
LMFT	Licensed Marriage & Family Therapist
LP	Licensed Psychologist
LPA	Licensed Psychological Associate
LPC	Licensed Professional Counselor
LPC-MH	Licensed Professional Counselor-Mental Health
LSW	Licensed Social Worker
MA	Master of Arts
MD	Doctor of Medicine
MEd	Master of Education
MS	Master of Science
MSEd	Master of Science in Education
MSW	Master of Social Work
NCC	National Certified Counselor
NP	Nurse Practitioner
PhD	Doctor of Philosophy
PsyD	Doctor of Psychology
QMHP	Qualified Mental Health Practitioner
RN	Registered Nurse
RPT	Registered Play Therapist
RPT-S	Registered Play Therapist Supervisor
SAP	Substance Abuse Professional
SWA	Licensed Social Worker
